Disease Management A Systems Approach To Improving Patient ...

Disease Management: A Systems Approach to Improving ... The disease management approach to patient care seeks to coordinate resources across the healthcare delivery system. The growing interest in evidence based medicine and outcomes, and a commitment to integrated care across the primary, secondary, and community care sectors, all contribute to making disease management an attractive idea.

Disease Management A Systems Approach To Improving Patient ...

Disease management is defined as "a system of coordinated healthcare interventions and communications for populations with conditions in which patient self-care efforts are significant." For people who can access health care practitioners or peer support it is the process whereby persons with long-term conditions share knowledge, responsibility and care plans with healthcare practitioners and/or peers. To be effective it requires whole system implementation with community social support networks
